

ServeTheWorld Dedicated Servers

The tables below show the three tiers of dedicated servers offered by ServeTheWorld.

Dedicated Server Hardware Specifications

Specification	Entry Tier	Mid Tier	Performance Tier
System Board	ASRock Rack EPYC4000D4U system board	Supermicro H12SSL-NT	Supermicro H13SSL-NT
Processor Model	AMD Ryzen 9 9950X	AMD EPYC 7443	AMD EPYC 9274F
CPU architecture (AMD)	Granite Ridge	Milan	Genoa
Number of Cores	16	24	24
CPU Clock Speed (Base / Max Boost - single core)	4.3 GHz base / 5.7 GHz boost	2.85 GHz base / 4.0 GHz boost	4.1 GHz base / 4.3 GHz boost
Threads	32	48	48
RAM (Main memory)	32GB	64GB	256GB
Memory Type	DDR5-5600 UDIMM (unbuffered)	DDR4-3200 RDIMM (registered)	DDR5-4800 RDIMM (registered)
Maximum memory supported	Up to 192GB	Up to 4TB	Up to 6TB
Storage configuration	2 x 960GB Samsung PM9A3 NVMe SSDs (RAID 1 configurable)	2 x 960GB Samsung PM9A3 NVMe SSDs (RAID 1 configurable)	2 x 960GB Samsung PM9A3 NVMe SSDs (RAID 1 configurable)

Network Interface (On-board / via Add-in NIC)	1/10GbE	10/25GbE	25/100GbE
PCIe Support	PCIe 5.0	PCIe 4.0	PCIe 5.0
Power Supply	Redundant PSU	Redundant PSU	Redundant PSU

Service and Commercial Details

Specification	Entry Tier	Mid Tier	Performance Tier
Pricing	Starting at 1,873 NOK/month	Starting at 2,819 NOK/month	Starting at 5,963 NOK/month
SLA	99.9% uptime guarantee	99.95% uptime guarantee	99.99% uptime guarantee
Best Suited For	• Single-thread applications • Game servers • High traffic web hosting • Application hosting	• General-purpose production use • Multi-service web hosting • Application hosting • CI/CD runners • Mid-size databases • Internal platforms • Proxmox VE host • Storage-heavy setups	• Demanding workloads • High concurrency applications • Large-scale data applications • Hosting a large number of VMs
Data Centre Locations	Oslo, Norway	Oslo, Norway	Oslo, Norway
Security and Compliance	ISO/IEC 27001 certified site placement on request	ISO/IEC 27001 certified site placement on request	ISO/IEC 27001 certified site placement on

			request
Provisioning and Delivery	1-2 business days (standard configurations)	1-2 business days (standard configurations)	1-2 business days (standard configurations)
Network Traffic	50TB/month included	50TB/month included	50TB/month included

Notes:

1. *Specifications may vary based on hardware configuration, BIOS version, and component availability. Network speeds above onboard limits require PCIe add-in NICs.*
2. *Custom builds, or systems that require non-standard components, may take longer.*
