

COVID-19 Facts

What is COVID-19?

Coronavirus disease of 2019 (COVID-19) is:

- a viral infection
- similar to influenza (common cold)
- caused by coronavirus
- highly infectious
- can severely affect your health

Who is at risk?

COVID-19 affects individuals of all ages.

It can adversely impact:

- children
- the aged
- immuno compromised individuals

How severe is it?

COVID-19 infection can:

- vary from moderate to severe
- depend on the individual's immunity
- sometimes be fatal

How does it spread?

COVID-19 spreads:

- through the air in the form of droplets
- from one human to another human
- from humans to animals and vice versa

What are the symptoms?

- fever
- cold
- cough
- sore throat
- breathing difficulty
- body ache
- loss of smell
- loss of taste

How can you stay protected?

- Always wear a mask when you are outdoors
- Wash your hands frequently with soap or hand sanitizer
- Cover your nose when you sneeze or cough
- Maintain social distance
- Avoid shaking hands with people
- Quarantine yourself for a week if you have symptoms

Is there a cure?

- If symptoms persist, please visit a doctor at the earliest
 - Two vaccines are currently available: Covishield and Covaxin.
- Consult a doctor if you are eligible and get yourself vaccinated.

Where can I know more?
