1.0 About Zoom Workplace

Zoom Workplace is a collaboration and communication software product by Zoom Inc.

2.0 Concepts

This section lists key concepts that you need to understand to work with Zoom Workplace.

1. Online meetings

Members of a team or a group need not be physically present together in the same meeting room any longer to conduct a meeting. Now, meetings can be conducted virtually, on the internet. Members of a meeting can attend meetings from

- a. home
- a. a cafe or
- b. office

using their mobile phone or laptop using collaboration software (e.g., Zoom Workplace, Teams). Such meetings are **online meetings**.

2. Video conferencing

Members of a meeting can

- a. see and
- b. speak to

each other in an online meeting by turning on/off

- a. video and
- b. audio

using collaboration software from their mobile phone or laptop.

Such a video meeting is called **video conferencing**.

3. Chat

Members of a meeting can engage in a

- a. Group chat involving everyone in the meeting
- b. Private chat with another member

This is similar to *text messaging* in WhatsApp groups on your mobile phone.

4. Whiteboard

A **whiteboard** is the online version of a classroom board. The host or presenter of a meeting can write and draw on a whiteboard using an online pen and other drawing tools. Members of a meeting can view the whiteboard.

3.0 Features

Zoom Workplace provides features in the below two categories. The features are detailed in sections that follow.

1. Communications

- a. Meetings
- b. Team chat
- c. Phone
- d. Mail and calendar
- e. Scheduler

2. Productivity

- a. Whiteboard

4.0 Meetings

You can

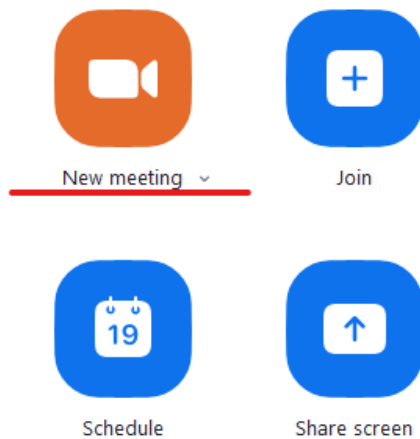

1. start
2. share
3. conduct
4. join
5. record

meetings on Zoom Workplace.

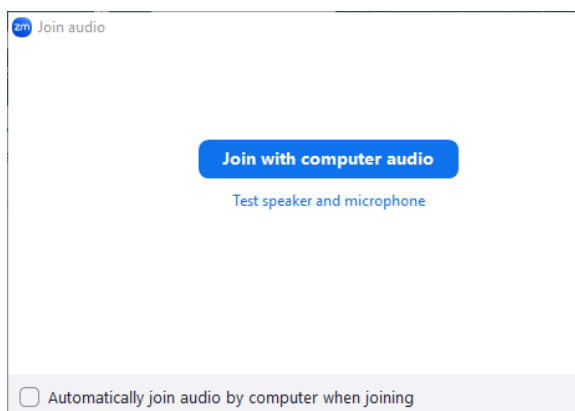

4.1 Start a meeting with video

Follow the steps below to start a meeting instantly.

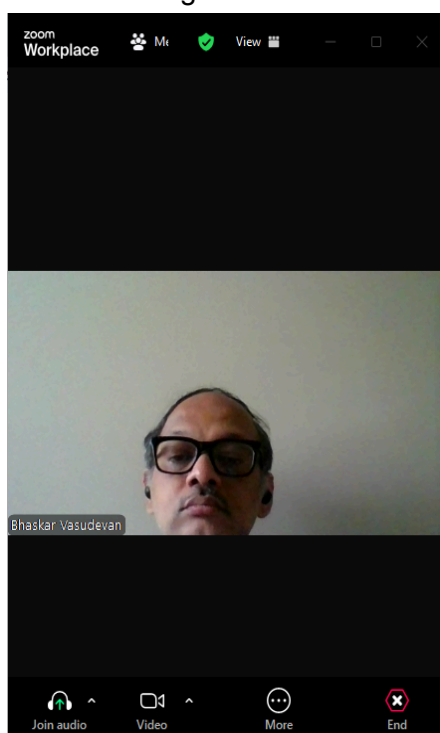

1. Click **New Meeting**.

2. Select **Join with computer audio.**

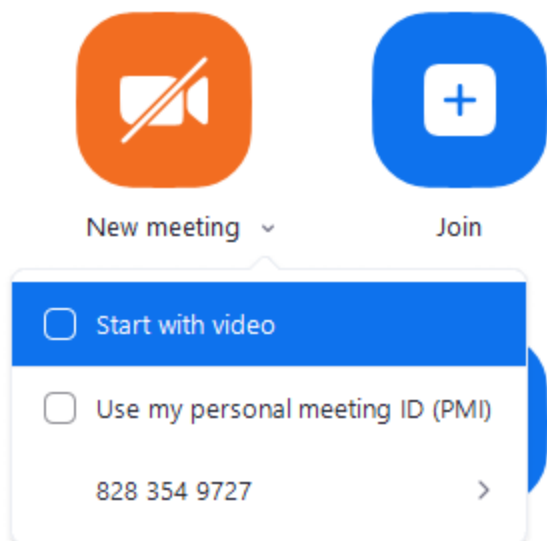

3. A new meeting window starts with video.

4.2 Start a meeting without video

Follow the steps below to start a meeting without video.

1. Click the little arrow next to **“New meeting.”**

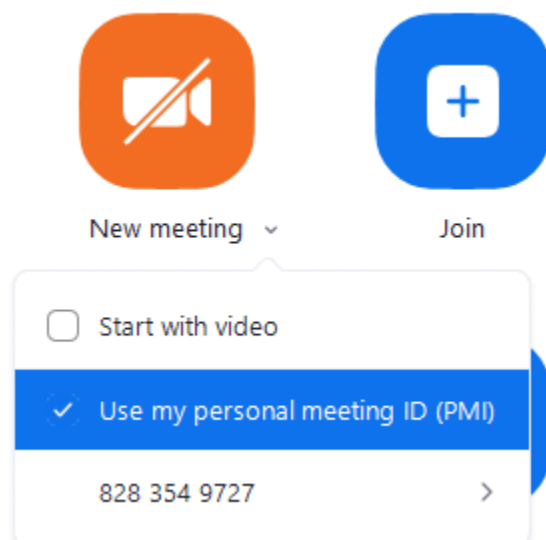

2. Unselect “**Start with video**” to start a meeting without video.
3. Click “**New meeting.**”
4. A new meeting starts without video.

4.3 Start a meeting with a personal meeting ID

Follow the steps below to start a meeting with your personal meeting ID:

1. Click the little arrow next to “**New meeting.**”
2. Select “**Use my personal meeting ID (PMI).**”

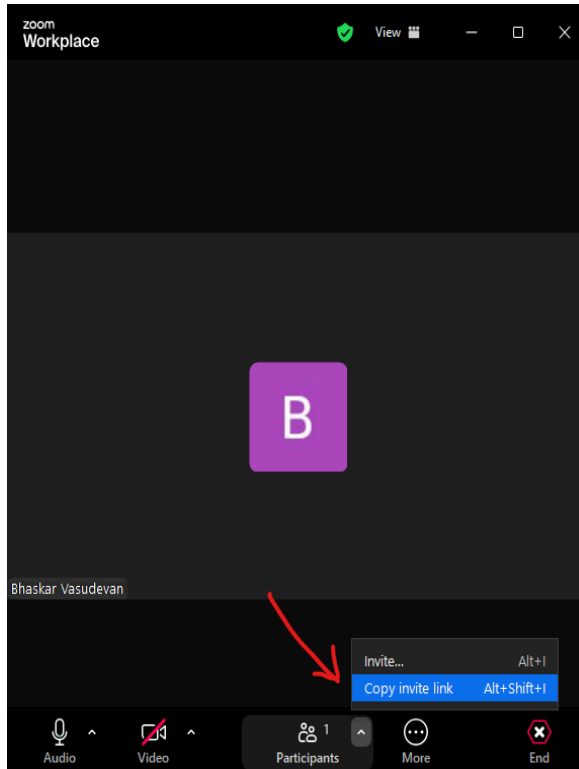

3. Click “**New meeting.**”
4. A new meeting starts with your personal meeting ID.

4.4 Sharing meeting link

Follow the below steps to share a meeting link with attendees:

1. Start a new meeting.
2. Copy the **invite link** as seen in the screenshot below.

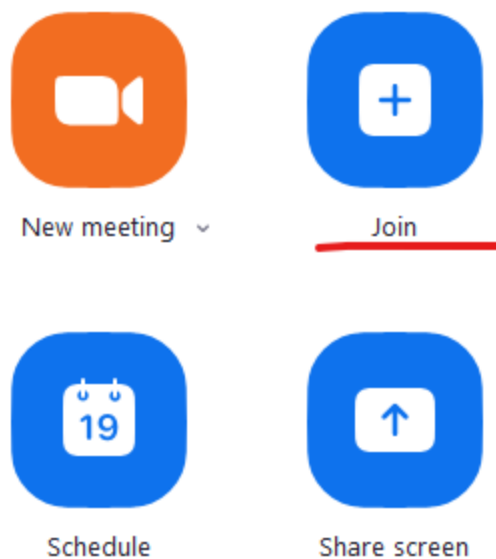

3. Share the link with attendees.

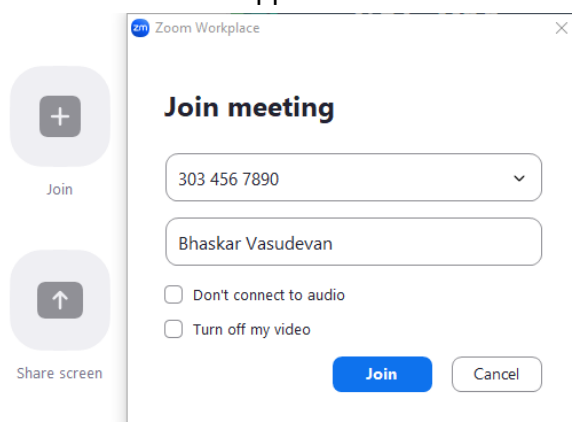

4.5 Join a meeting

Follow the steps below to join a meeting:

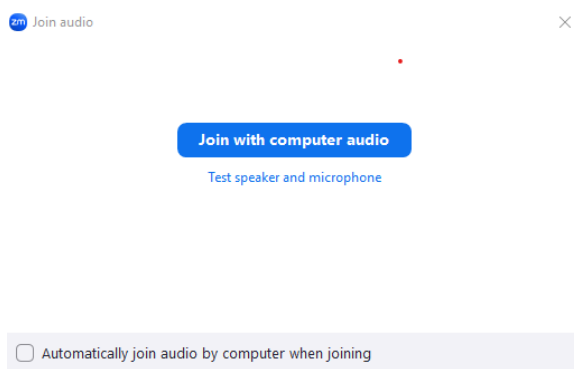

1. Click **Join**.

2. The below screen appears.

3. Enter **"Meeting ID"** or select the meeting you want to join from the drop-down menu.
4. Edit name shown if you desire.
When you join the meeting, you will appear with this name.
5. Select **Don't connect to audio** if you want audio to be turned off when you join the meeting.
6. Select **Turn off my video** if you do not want to appear on video when you join the meeting.
7. Click **Join**.
8. Select **Join with computer audio**.

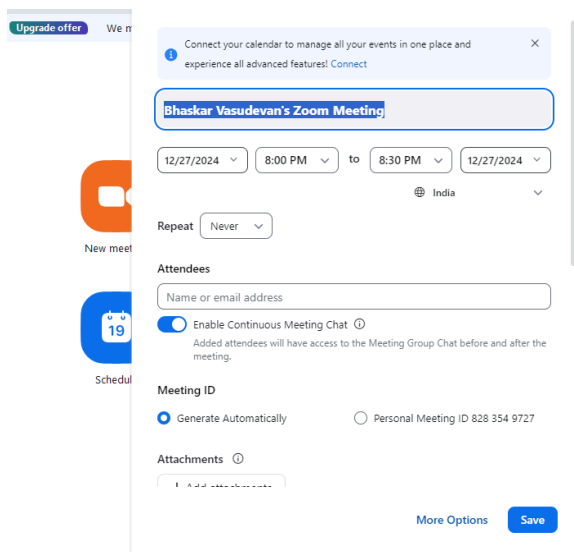

9. You will be in the meeting.
10. Click **Unmute** if you desire.

4.6 Schedule a meeting

Follow the below steps to schedule a meeting:

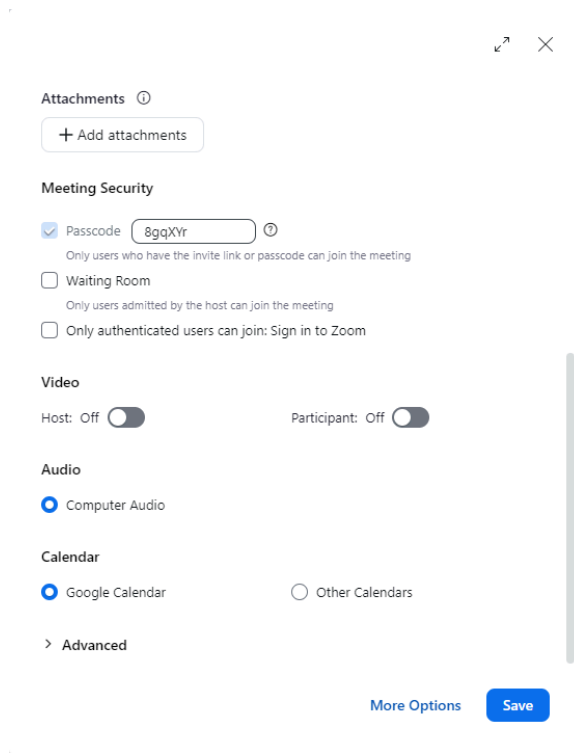

1. Click **Schedule**. The below screen appears.

2. Edit the meeting name if you desire.
3. Select the meeting start date and start time.
4. Select the meeting end date and end time.
5. Select **Repeat** frequency as desired. The default value is **Never**.
6. Enter the email addresses of the meeting attendees.
7. Leave **Enable Continuous Meeting Chat** enabled if you desire. If you turn off this setting, meeting chat will be disabled.
8. Select one of the below for **Meeting ID**:
 - a. **Generate Automatically**. A random meeting ID will be generated by Zoom Workplace.
 - b. **Personal Meeting ID**.

Your personal meeting ID will be used as the meeting ID.

9. Add any attachments you want to send along with the meeting invite to meeting attendees.

The screenshot shows the Zoom meeting settings dialog box. It has a title bar with a close button (X) and a maximize button. The settings are organized into sections: Attachments, Meeting Security, Video, Audio, and Calendar. The Attachments section has a button to add attachments. The Meeting Security section has three options: Passcode (checked, with a text field showing '8gqXYr'), Waiting Room (unchecked), and Only authenticated users can join (unchecked). The Video section has two toggle switches: Host (Off) and Participant (Off). The Audio section has two radio buttons: Computer Audio (selected) and Other Audio. The Calendar section has two radio buttons: Google Calendar (selected) and Other Calendars. There is a 'More Options' link and a 'Save' button at the bottom right.

More Options Save

10. Change the **passcode** for “**Meeting Security**” if you desire. By default, a random passcode is provided as seen in the screenshot.
11. Select **Waiting Room** if you want attendees to wait in a virtual lobby before they are admitted to the meeting.
12. Select “**Only authenticated users can join; sign in to Zoom**” if you want attendees to have signed into Zoom before joining the meeting.

4.6 Actions in a meeting

Once you are in a meeting, you can perform various actions. The below screenshot shows the options available.

These options are available for both

1. the presenter and
2. the participants of the meeting.

However, some actions are available only to the presenter. e.g., the ability to

1. mute all participants in a meeting.
2. end a meeting.

Actions

1. **Audio:** Click on Audio to turn audio on/off. If you turn off audio, you will be muted. You can still hear the others speak.
2. **Video:** Click on Video to turn video on/off. If you turn off video, you will not be seen in the meeting via video camera. You can still view others (if they have turned their video on) and hear others speak.
3. **Participants:** Click on Participants to view the participants in the meeting.
4. **Chat:** Chat with everyone in the meeting or privately with specific participants.

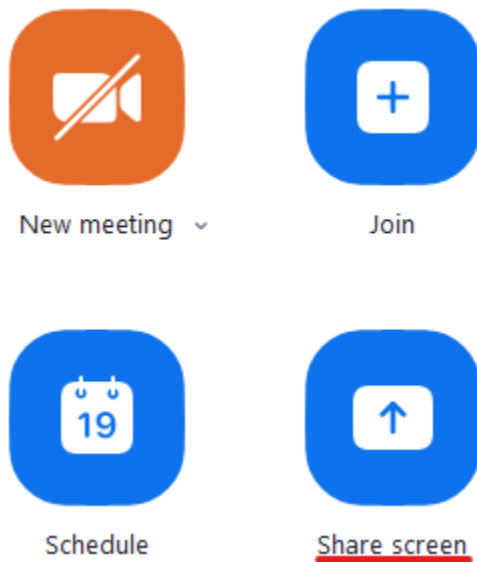

5. **React:** Post a reaction to the presenter of the meeting.
6. **Share:** Share your desktop or a window on your desktop with the meeting attendees.
7. **More:** More actions you can perform.
8. **End:** End the meeting.

4.7 Share screen

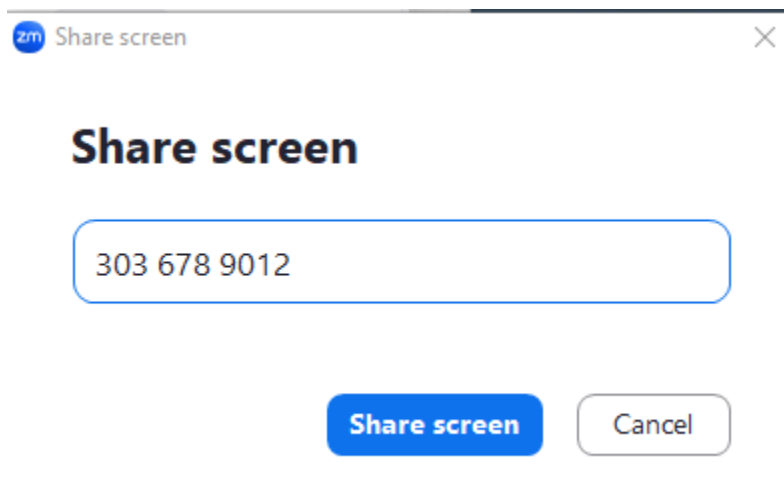

You can share your laptop or desktop screen with others using this option. This option is useful for support engineers to troubleshoot a problem on your computer.

Follow the below steps to start sharing your screen:

1. Click “**Share screen.**”

2. Enter the **sharing key** or the **meeting ID** provided to you.

3. Click “**Share screen.**”
