

What's new in this update

We are glad to announce the release of WhatsApp version 2.3.0, which includes new features, improvements, and defect fixes.

New Features

You can now:

- a. Control how long it takes to retain chats (disappearing messages).
- b. Block contacts.
- c. Silence unknown callers.
- d. Lock chats.
- e. Lock WhatsApp.
- f. Encrypt chat backups.

Improvements

- WhatsApp now supports two-step verification starting with version 2.3.0.

Known Issues

- The privacy settings available on the WhatsApp mobile app are not available on WhatsApp Web.
 - Chat Lock
 - Live Location

These will be addressed in an upcoming release.

Defect fixes

WhatsApp version 2.3.0 contains the below defect fixes:

- A defect related to PDF export in dark mode has been fixed.

Update your app to WhatsApp version 2.3.0 to enjoy the new features and improvements.
